

## Poster Guidelines

For the All-SystemsX.ch-Day

SystemsX.ch encourages scientists to bring posters of their research projects along. There are two different categories for posters:

### a) Posters of SystemsX.ch Research Projects (RTDs, IPPs, SIPs)

All SystemsX.ch scientists of the following categories can be submitted:

- 1) RTDs
- 2) IPPs
- 3) SyBIT
- 4) Technology Platforms
- 5) Scientific industry collaboration projects (no commercials!)

The purpose of a poster is either to present aspects of the research or emphasise parts that are in planning and where additional expertise is needed. Additional information can be added.

#### Proceeding for Poster submission:

- Indicate in the registration mask for which category you will submit a poster
- Send an abstract of max. 1 page containing information about: Title, Authors, Logos, Thematic field to [admin@systemsX.ch](mailto:admin@systemsX.ch)

### b) Young Researchers' Poster Prize

PhDs of SystemsX.ch projects can apply for the SystemsX.ch Young researchers' Poster Prize sponsored by XY. The best three posters will be awarded with a prize. To apply for the award, please indicate accordingly in the registration mask.

The purpose of the posters are to show an interested scientific public what is being done in the respective PhD project. There will be a jury of SystemsX.ch researchers that will judge the posters.

SystemsX.ch will select a jury of 4-6 scientists of the Scientific Executive Board and projects. They will judge the poster by 1) evaluating the poster and 2) evaluating the abstract.

#### Proceeding to submit a poster for the Poster Prize:

- Indicate in the registration mask which category you will submit
- Send an abstract of max. 1 page containing: Title and author of the poster, mentor of the author, scientific field and keywords, contact address and a summary of the PhD research including aims.
- Send this abstract to [admin@systemsX.ch](mailto:admin@systemsX.ch)
